NPIC Project J-168/63

Two newly identified revetted circular areas, measuring 170 feet in diameter and 650 feet apart, are located on the east side of Volkovysk SA-2 SAM Site B-19. Each area is apparently drive-through. This activity was present on [REDACTED] photography but not present on [REDACTED] photography.

SA-2 SAM Site B-19 appears to be fully equipped with launchers, guidance equipment, missile transporters, and support equipment. SA-3 SAM Site B-19A, adjacent to the northwest corner of the SA-2 site, appears to be fully equipped with launchers, probable electronics equipment, and vehicles in the hold revetment.
